Mr. Jones,
Hope you're having a good week!

I'm writing on behalf of my son Jake.

My father recently gave Jake his old stamp collection, and to my surprise, Jake has become really invested in it. His grandfather has been collecting stamps since before I was born, and the two of them have become really close.

Jake even did some research on stamp collecting and came across your site. He really likes all the resources you provided on this page (<https://sanjoseesc.com/links/>) and even managed to teach his grandfather some new things after reading through them!

Since this isn't a hobby that younger people are often drawn to, Jake wanted to send along this resource that inspired him to incorporate technology into philately: <https://www.mapcon.com/us-en/stamp-collecting-software-and-resources>

It's got some links to different stamp collecting softwares, and information on the hobby in general, and he thought it would be a great resource for your readers to check out!

Would you consider adding it to your page for him? We're going to dinner at my parents' house on Friday, and I'd love for Jake to get to show his grandfather.

I can't believe it's October already! I hope you're enjoying the Fall!

Best wishes,
Katherine Reid
